README for database project PHP application
Xiaomeng Li and Vanessa Job

Upload the database using PHPMyAdmin.

Unzip the music.zip files.
You should be able to see four PHP files and three PHP folders.

MYSQL:
Go to your MYSQL. Create a user called 'xiaomengrules'. Below we will introduce the procedures and commands you should input to terminal after opening mysql.

    A. After importing everything using phpmyadmin, you should now have a database called "Sunday".

    B. Login MYSQL with "mysql -u root -p" as root. Input into terminal "use Sunday".

    C. Type in:

→ CREATE USER 'xiaomengrules'@'localhost' IDENTIFIED BY 'password';

Now, a new user is created called 'xiaomengrules' with password 'password'.

    D. Grant access now. Type in:

→ GRANT SELECT, INSERT, UPDATE, DELETE, CREATE, DROP, ALTER ON sunday.*

→ TO 'xiaomengrules'@'localhost'

→ IDENTIFIED BY 'password';

```
mysql> SHOW GRANTS FOR 'xiaomengrules'@'localhost';
+--------------------------------------------------------------------------------------+
| Grants for xiaomengrules@localhost                                                   |
+--------------------------------------------------------------------------------------+
| GRANT USAGE ON *.* TO 'xiaomengrules'@'localhost'                                    |
| GRANT SELECT, INSERT, UPDATE, DELETE, CREATE, DROP, ALTER ON `sunday`.* TO 'xiaomengrules'@'localhost' |
+--------------------------------------------------------------------------------------+
```

PHP:
Open your favourite brower. I use Firefox.

    A. Direct your directory to the music file folder you just unzipped. You should be able to see the following picture.

Index of /~xiaomengli/phptesting/music

Name	Last modified	Size	Description
Parent Directory		-	
boss/	2018-04-29 18:29	-	
bosslogin.php	2018-04-26 13:31	1.7K	
employee/	2018-04-29 18:54	-	
employeelogin.php	2018-04-21 19:59	1.8K	
mysqli_connect_music..>	2018-04-17 21:11	1.2K	
player/	2018-04-28 13:26	-	
welcomepage.php	2018-04-22 13:59	1.5K	

B. Open the Welcome page. There should be three accesses available.

1. Should you choose boss: Account: Xiaomeng   Password: phprocks
2. Should you choose employee: Account: tom   Password: 1234
3. You can login Player without password or account

All of account password information are available on user table.
